Study Materials

By Amy Dunfee

I bought this book for use as study materials for the geriatric specialty credentials. It was a nice price, cheaper than the other usual place that sells it, and it was the most up to date version. Informative and useful. It does not have plentiful graphs/tables/charts, and it is in black and white. I would have preferred more charts. Each chapter has its own list of references. Complete with index.

RD be aware

By ML

I gave this book a 3 star because it is filled with relevant information regarding LTC nutritional standards of care. However, if you are buying this book to get CEP, as someone wrote under another review, be aware that the book does not include the test or the option to reclaim CPEs. I guess one had to buy a separate test from another website that sell just the test for more money than the book itself!

Save money RD's

By HolliRD

Great book at less than half the price of other ones I've found. I got a great deal on the 30 credit test that goes

with the book from another company thar wanted \$149.00 for the book. Don't think you could get 30 credits cheaper any place else.
