The WWF, renowned global nature conservancy brand, greenwashes the ecological crimes of corporations currently destroying the last remaining rainforests and natural habitats on earth; and it accepts their money. This business model of the famous “eco” organization does more to harm nature than to protect it.

The WWF cannot refute the facts gathered by esteemed journalist and filmmaker Wilfried Huismann during his two-year research expedition to all corners of the green empire. A journalistic tour de force unearthing the grim secrets behind the warm and cuddly façade of the WWF, Huismann’s exposé went straight to the German bestseller list. The book is now available in English, unabridged and updated.

Huismann also dug deep into the early history of the world’s most powerful nature conservancy organization and found several skeletons in the closet: the elite secret club known as “The 1001” and a private military commando unit deployed in Africa against big game poachers – and against black African liberation movements. In the name of environmental protection the WWF has participated in the displacement and cultural extinction of indigenous peoples the world over.

A spotlight on Corporate "non-profit" wildlife conservation

By Truman Goldendog

This is a well written, fact-filled examination of corporate "non-profit" wildlife conservation. Huismann has produced a readable expose of how protecting the giant panda, African elephant, and other creatures has become a source of Big Bucks, fame, and prestige for a relative few people. Extremely high salaries, business class air travel, and often ineffective results for the imperiled species. Everyone who donates their \$20 every year to the World Wildlife Fund, Conservation International, and other big conservation groups should read this book.

hooking-up with firms like Monsanto, deserve being a trusted brand

By Stephen Corry

If you care about conservation, read this and be shocked. Since they were first invented, "conservation" zones have stolen tribal lands. It's still going on, not only destroying tribal peoples, but preventing genuine conservation as well. Does WWF, controlled by industrialists, hooking-up with firms like Monsanto, deserve being a trusted brand? The conservation industry must change – but it won't happen unless people wise up to the kind of stuff revealed in this book.

Panda Leaks is a must read if you love the planet

By Dennis Dougherty

For anyone interested in what is happening to our ancient forests and the animals that used to live in them... this is required reading. It is heart breaking to think the WWF would white wash the activities of greedy companies and to pander them off as sustainable is appalling. Panda Leaks is a must read if you love the planet.
