POCKET CARDIOLOGY (POCKET NOTEBOOK SERIES) BY MARC S. SABATINE MD MPH PDF

Be prepared for the challenges of patients with complex cardiovascular disease!

Prepared by cardiologists at Massachusetts General Hospital and Brigham and Women's Hospital, this supplement to the bestselling Pocket Medicine internal medicine handbook uses bulleted lists, tables, and algorithms to put key clinical information about a broad range of problems in cardiovascular medicine at your fingertips.

- In-depth coverage of an extensive array of cardiovascular conditions beyond what is in Pocket Medicine, including comprehensive discussions of cardiomyopathies, advanced heart failure, cardiopulmonary exercise testing, peripheral artery, renovascular, and cerebrovascular disease, wide complex tachycardias, sudden cardiac death, and electrophysiology studies.
- Apply the latest treatment options for major cardiovascular diseases with incorporation of more detailed diagnostic testing and sophisticated treatment algorithms.
- Provide informed, effective patient care with current, evidence-based clinical recommendations, supported by key references to the most recent practice guidelines, high-tier reviews and important clinical trials.
- Enjoy this portable, user-friendly reference by adding Pocket Cardiology to your Pocket Medicine.

This content is spiral bound. You can also purchase the loose-leaf version. Search ISBN: 978-1-4963-3966-9.

2 of 2 people found the following review helpful.

Its quite thin and lacking

By Jean

Its basically the chapter in the Pocket Medicine made into a thin notebook. Having read and used Pocket Medicine, Pocket Neurology, Pocket Emergency Medicine, Pocket Anesthesiology and Pocket ICU, and as a graduated Cardiologist myself, it frankly leaves a lot to wish for. Yes, its a bit more up to date and refines a few rough corners, but its quite lacking. Its essentially only the chapter of Cardiology in the Pocket Medicine Book. Cardiology is a vast specialty, complex and much much more than what this "summary" has. I suggest a review of the american and european guidelines next time, and including LOTS of the tables and diagrams in these in the next edition. Missing subjects: Adult Congenital Heart Diseases, shunt quantification and measurements, Cath Lab: left and right heart, Pregnancy and Cardiology, specially anticoagulation for

pregnancy. Advanced cardiac support devices and heart transplantation, types, indications and contraindications, In summary: Disappointing.
