Starred Review It stands to reason that a big, heavily illustrated book of instructions on how to upholster furniture should be as attractive as the finished projects it presents. And that is certainly the case with this gorgeous book, which perfectly matches complete, precisely written directions with correspondingly crisp, helpful photographs. Brown is an Austin, Texas–based upholstery shop owner whose expertise simply leaps off every page. Her guiding philosophy is that “upholstered furniture is the root of an interior,” and to that end, she addresses nonprofessionals who are learning to upholster their own furniture, taking them through six projects that can be categorized as advanced but for which all necessary skills are taught along the way. These projects include a pair of slipper chairs, an ottoman, and a sofa. Specific activities required for completing the projects include padding and constructing boxed arms, attaching webbing and burlap to the arms, attaching the dust cover to the bottom of the sofa, and cutting out fabric for the cushions. Sound dizzyingly complicated? Take a breath and follow Brown step by step, and you’ll be surprised at how talented you may become in the art of upholstery. This is a bible, a catalog, a wish book, and an excellent library reference source. --Brad Hooper

Review

“Brown, a professional upholsterer in Austin, TX, knows how to breathe life into tired old furnishings. Her style is hip, eclectic, and delightful, and she injects her personality into the projects, showing off her upholstery prowess. Brown rounds out the manual by offering interior design options. Accompanying photographs demonstrate technique and illustrate each step. Readers will find information on skills requiring much more detail, such as the sewing and stripping furniture, in the appendixes. VERDICT Though the author only covers five projects ? a sofa, an ottoman, and three chairs ? she does so in such great depth that quality wins out over quantity. Upholstering is for the brave, and there are a lot of specialty tools here that might intimidate would-be DIYers. Despite these limitations, this is a wonderfully readable volume that speaks to current style. Very highly recommended for any DIY collection.” ? Library Journal, starred review

Pure Awesomeness

By Jessica Black

I've looked at quite a few upholstery books since I don't have any places nearby that teach upholstery. This one by far is my favorite. Reasons I prefer this book above the rest:

The author covers enough different styles of furniture so that you can tackle anything - and shows you how to determine which instructions would be best in her book for different pieces of furniture.

The upholstery lingo isn't over my head. This is a book that will help the beginner, intermediate and advanced. I feel like I don't need to look anywhere else to learn how to reupholster. She is truly an expert, but remembers how it was to be a beginner.

Many upholstery books I look at seem very dated. They use techniques that aren't current - from what I've seen on blogs and youtube videos. The author combines more modern techniques (using foam and pneumatic stapler) with techniques that will help your piece of furniture stand the test of time.

Her style is lovely. Very inspirational. Combines traditional, vintage with a modern flair.

Great pictures and instructions. High quality book (even has a few book marks built in).

If you're considering buying any upholstery book...you don't need to look any further. The only reason you wouldn't need to buy this book is if you lived in Austin, TX and could take a class from her personally.

Well done

By A. Stubbs

Well written, well photographed, well indexed, and well bound (I was especially pleased with the three bookmark ribbons).

This may be the upholstery book you are looking for. I'd be hard-pressed to find a flaw with it.

If I lost it, I'd buy it again, I'd even pay more.

Really tells you all you need to know ...

By Bertie House

This is an amazing book: it is comprehensive, yet to the point. Since I had taken apart my antique dining chairs I could see how they had been made. But the stuffing was burlap, straw, felt, cotton, so I had to adapt with modern material for the seats and backs. I was kinda stumped with adapting to foam: 1" for the backs and 2" for the seats. But I found the answer: "burlap pulls:" the secret to attaching square foam backs/seats to an open square hole and achieving a rounded-off finished edge. Hooray! I am not a seamstress, have never sewed anything except an apron in Home Ec course in the 50's. Amanda's level of detail is perfect: just enough to help you figure it out with the specifics of your project. Highly recommended.
