I look forward to using activity pages from *The CBT Art Activity Book* - the detail and content of each page is ideal for the kind of art journaling and creative expression activities I do with my clients. The use of cognitive behavioral therapy within the handouts is a bonus! -- Bonnie Thomas, LCSW Child and Family Counselor and author of 'How to Get Kids Offline, Outdoors, and Connected to Nature: 200+ Activities to Encourage Self Esteem, Mindfulness, and Wellbeing' A little treasure inspired by cognitive behavioural psychotherapy ideas and creative principles. Beautiful and easy to use worksheets, which will compliment a clinician's tool kit. Especially helpful for brief interventions with emphasis on emotional exploration. -- Themis Kyriakidou, MA ATh, MSc FPC, Art Psychotherapist I am neither a CBT therapist nor an artist - and yet it feels like this book was produced with me in mind. A synthesis of informative text and inspirational designs that leave me excited about new possibilities in my work with a whole range of people I'm working with - young people, adults and families. This book will appeal, and be extremely useful to counsellors and therapists from a broad spectrum of theoretical orientations, and is by no means limited to those who describe themselves as 'CBT therapists' or as being 'artistic.' Bravo Jennifer, this is a wonderful resource for enhancing and deepening the therapeutic encounter. -- Paul Stockwell, UKCP Registered Family and Systemic Psychotherapist and Clinical Supervisor What a brilliant resource for therapists working with young people! The worksheet designs are immediately engaging and aesthetically suited to young people. Each section starts with brief helpful and accessible information for the counsellor. I am sure that this is what young people want - an opportunity to have conversations with adults on their own terms, choosing a word, a question, a pattern to work into. An important addition for the counselling field. Adults will want to use it too! -- Dr Gail Simon, Principal Lecturer in Systemic Practice, University of Bedfordshire The author sums up the core principle of CBT therapy in a very readable, clear and concise way... Guest's lovely, intricately patterned backgrounds and frames are reminiscent of the current spate of adult colouring books and allow the sheets to appeal to different age groups... One of the things I love about this book is that the author's drawings invite the user to "have a go", "make their mark" and not worry whether they are "artistic" or not... I have certainly enjoyed using this book myself, as well as inviting clients to use it to help them explore their own thoughts, and would happily recommend it to other therapists. -- Trisha Packer, counsellor and

Need a digital version.

By S. Yacco

Great worksheets for students to express themselves. Would be perfect if you could buy a digital version or in a 3 ring binder. It says "photocopiable" but the pages don't lay flat enough to make a nice copy.

Overpriced for Content

By A. Bauer

There are definitely some useful exercises in this book, but half of the book contains coloring sheets. Wish I had known that before ordering. I can get mandalas for free online. The other coloring sheets are nicely designed letters of the alphabet-one per page, but I'm not sure how I will use those. They don't seem very CBT-oriented, which is what I was seeking in purchasing this book.

The first half of the book is great. The second half was a waste of my money.

I get bored running the same discussion based groups on the adult inpatient unit that I work on and was very excited when I stumbled upon this coloring book. Has a number of great coloring pages that I can use with clients in group while we discuss CBT concepts. I wish it included more pages with therapeutic content as the back half includes a coloring page for each letter of the alphabet and a couple of mandalas, but those are usually nice to have on hand for patients that enjoy coloring in their down time. Cute book with therapeutic value that I will definately be using more of in the future!
