A daring and controversial exploration of man and his environment.

"Desmond Morris has laid it on the line again... brilliant, witty, provocative." - Boston Herald Traveler

"THE HUMAN ZOO will be as widely read as The Naked Ape, not just because it is entertaining... Morris helps us take a new look at ourselves, not against the backdrop of our accepted culture, but against the wider vistas of our biological heritage." -Chicago Tribune

"THE HUMAN ZOO is more ambitious, more compelling, than The Naked Ape... absorbing and insightful... Morris is concerned with the tension between our biology and our culture, as it is expressed in power, sex, status and war games." - The New York Times

The Human Animal Exposed

By Bugs

Desmond Morris wrote this book in 1967 and it is as relevant today as it was then. We are treated to a fascinating, revealing, serious study of human ecology interlaced with humor and insight that only a first rate, dedicated zoologist could provide. Chapters cover our human peculiarities of origin, sex, anatomy, child rearing, exploration/innovation, fighting, feeding, comfort; relations to all other animals and environment; population management or rather, our serious lack of it; and amazingly, even that special peculiarity of humans- language, religion, politics and economics along with insights into the serious lack of efficacy in our endeavors.

This is a true, bare to the bones, scientifically detached observation of the human animal and makes no apologies for "exposing" us in our varied and peculiar habits. An excellent eye-opening read, truly educational and enlightening!

For those who are interested in biology, sociobiology, ecology, etc., will no doubt enjoy what can be seen as a large expansion on Morris' theme in the book: "Mammal in the Mirror" by the daughter and father science team of David and Ilona Barrash. It is truly off-the-charts for a study of us quirky humans.

Enlightening

By Mommy Dearest

I have owned this book in various stages of my life ... now that my son is married with a son on the way I am

about to buy it again... this time for him. I believe everyone should read this book it explains so much about us .. and why we do the things we do as people. It was a real eye opener.

Absolutely amazing. Highly recommend.

By Ameer M.

Truly a book that makes you take a second look at your life and think "Am I doing the things I love because I love them, or because it's in my nature?" Would highly highly recommend for anyone who wants a better insight into human behavior. Easily one of my favorite books.
